

Youth Leading in STEM Camp 2019

An enriching educational
experience for Year 9 and
10 students at the
Australian National
University, Canberra

**Empowering students
from Canberra and
regional NSW to
become the future
leaders of STEM**

Our Camp and Mentorship Program

The Youth Leading in STEM 2019 program offers year 9 and 10 students from Canberra and regional NSW public schools a unique and enriching opportunity to experience STEM at the level of one of Australia's leading universities, ANU. Students will stay on the ANU campus, participate in workshops in STEM disciplines, meet leading scientists and current university students, and gain skills in teamwork, leadership and communication. Following the camp, students will work with an ANU student mentor to create their own STEM-based project for their school or community. We also invite interested teachers to attend and explore the offerings of the ANU through our Educator Program.

We aspire to inspire a new generation of leaders in STEM, and to build greater diversity of gender, education, and socioeconomic background in the next generation of STEM students and professionals. The Youth Leading in STEM program is possible thanks to the generous sponsorship of the Australian National University.

When?

Thursday 27th -
Saturday 29th June
2019

Where?

The Australian
National University,
Acton Campus,
Canberra
